EMERGENCY CHECKLIST

I live in zone _____.

My reception center/shelter is _____.

My evacuation route is _____.
(See emergency map on page 8). If you cannot determine your zone, please contact Plant Vogtle Emergency Preparedness at **706-554-2127**.

HOW TO DETERMINE YOUR ZONE

Notice on the map (on page 8) that the 10-mile area has been divided into zones. The number by the zone letter tells the distance (in miles) between that area and the plant.

Government officials will give instructions on which zones are affected and what actions should be taken. You should know the zone in which you live and work.

OTHER IMPORTANT NUMBERS:

INFORMATION FOR FARMERS, FOOD PROCESSORS AND DISTRIBUTORS

State and local emergency response officials could issue special preventive and emergency protective actions for farmers, food processors and distributors. Those instructions may include:

- Cover outside feed supplies with a tarpaulin or other appropriate material.
- Cover open water sources such as wells, rain barrels, tanks, cisterns, etc.
- Remove dairy animals, poultry and other livestock from pasture. Shelter them if possible and provide them with protected feed and water.
- Do not use fresh milk from your dairy animals, vegetables from your garden or eggs from your poultry.
- Cover harvested crops or store them indoors.
- Do not process or distribute agricultural products until they have been sampled by appropriate government officials and found to be free of contamination.
- Do not engage in dust-producing activities such as cultivating, disking, baling or harvesting.
- Wash, scrub, peel or shell fresh fruits and vegetables before eating them.
- Wash hands thoroughly before preparing or eating food.
- If ordered to evacuate, provide plenty of food and water for your animals. Make sure shelters are well ventilated during hot weather. Farmers will have opportunities to return to their farms to care for their livestock, under supervision of emergency workers.

Emergency officials will advise you what to do based on the type of emergency and other factors such as the distance of your farm or facility from the plant and the prevailing wind conditions. Follow their instructions to prevent or minimize contamination of food products.
